

NOVA

Pendant

“NOVA is an abstract reinterpretation of the images of stars beyond telescope or a space ship in the science fiction film. NOVA's colorful sticks and dramatically shaded shadows will make the space more whimsical.”

NOVA brings dramatic impression to the space with its delicate structure and vibrant colors. NOVA will express the supernova explosion and bring the universe into the space. All metal parts of NOVA are assembled only with screws without welding or gluing. This expands the possibility of modularity to increase the scalability of the design and broaden the choice of consumers through various color combinations.
