1. General dimensions of the lamp.
2. Place the base (B) at the bottom of the tube. To attach it, first insert the serrated washer (C) and then tighten the nut (D).
Loosen the ring (E) on the bulb holder. Attach the shade (F) and screw the bulb (G) into the lamp.

* If the flex cable of this lamp is damaged, it must only be replaced by the manufacturer, its technical service, or by the equivalent qualified professional, to avoid any risk.

Consumer information:

- Lamps without the IP mark are classed as IP20 and are designed for general interior use, except wet areas (bathrooms, etc.)
- Lamps with the IP mark are designed for exterior use and in wet areas. (E.g. IP54)
- They offer guaranteed protection to people and animals against electrical discharge:
  - Class I: through single electrical insulation and an earthing conductor once correctly connected.
  - Class II: through double electrical insulation.
  - Class III: these kinds of lamps should be connected at very low voltage levels (generally 12V); therefore there is no risk.
- Lamps with this symbol, or without any symbols, can be mounted directly onto normally inflammable surfaces.
- Lamps with this symbol cannot be mounted directly onto normally inflammable surfaces.
- The safety of this lamp is guaranteed by using a maximum wattage bulb that does not exceed the figure displayed visibly on the lamp.
- The product cannot be treated like conventional domestic waste; it must be taken to the corresponding recycling point for electrical and electronic equipment.
