

Easy Light

BARCELONA / BY CARPYEN

*Closer
to Nature*

A new momentum

74 years old this year! Ten times the age of reason for Carpyen, the lighting manufacturer “Made In Barcelona”. Ten good reasons to open up to the world for this family company, ten good reasons to always be innovative and creative.

In 2018, the Carpyen manufacture direction has changed, a new impulse has been printed and new ideas are now expressed. In 2020, Carpyen launches CARPYEN EASY LIGHT, a collection of lamps with a responsible design, at an affordable price, without depart from the elegance that has made Carpyen an international reference since 1948.

EASY LIGHT

“We are from Barcelona, a city of light; We were born here and we grew up here. We continue to manufacture all our products on site, we are inspired by a lively, original, and cosmopolitan city, with a Mediterranean blue horizon, thousands of spaces to discover and thousands of stories to tell. We are proud to show the world that Carpyen “MADE IN BARCELONA” has a strong image and inexhaustible creative resources.”

Above all, it’s a human adventure. That is the beautiful and proud motto of the women and men at Carpyen.

A whole world of light to endlessly create and recreate in Carpyen’s workshop, in Spain.

from Barcelona

Natural trip

Exploring Spanish geography, let's take a new glance at the beauty of nature, from the Mediterranean islands, Balearic and Cantabrian, to the volcanoes of the Canary archipelago. Let's discover the natural phenomena caused by the effect of marine erosion and rain on limestone rock, giving way to cracks that connect the sea to the land in Asturias, to waterfalls that form a river at the mouth of the ocean in the Galician lands, to the wild beach of the Basque Country.

Optimism

Home is a feeling

Craftsmanship excellence and natural material define our new collection of suspension lamps, designed and manufactured in our own workshop in the heart of Barcelona.

The passion of our team combined with technical know-how contributes to uncompromising high quality and local production. The collection thus incorporates an environmental approach: ecological awareness and reduced carbon footprint. At the core of Carpyen vision, for over 74 years, responsible design invites itself in our homes at a reasonable cost.

Elegant pendant lights consist of a timeless design and essential shapes punctuated by refined pieces in wood or cork. Such materials bring us closer to nature, offering us a genuine feeling of well-being, comforting us in the days after this crisis. Like a refuge, our interior must be a real cocoon, to reassure and soothe us. Each light therefore plays with its unique composition to create a pleasant and comfortable atmosphere, to feel really good at home.
