Empty State

Installation Guide

Pill

NOTES

Make sure the ceiling is capable of supporting the weight of the light. We recommend you seek the advice of a structural engineer or construction professional.

Fixings not supplied. The appropriate fixing will vary depending on the ceiling substrate, therefore fixings will not be supplied. Please use an appropriate fixing to suit your solution.

Installation should be carried out by a suitably qualified electrician. Access to ceiling void required.

Installation only requires one person, however we would recommend two for best results.

Installation should be carried out by a suitably qualified electrician. Access to ceiling void required.
Installation only requires one person, however we would recommend two for best results.

Step 01

Wire the driver to the mains via the terminal blocks in the driver, making sure they connect to power in.
Note: Align ceiling void hole to driver access point.

Step 02

Fix the ceiling rose canopy to the ceiling using 5mm wood screws. Fixings are not provide.
Note: Be sure the screws sit within the counter sink

Step 03

Loosen the grub screw in the side of the chord grip. Be careful no to fully unscrew. Then slide the chord through the grip and back out of the ceiling rose canopy.
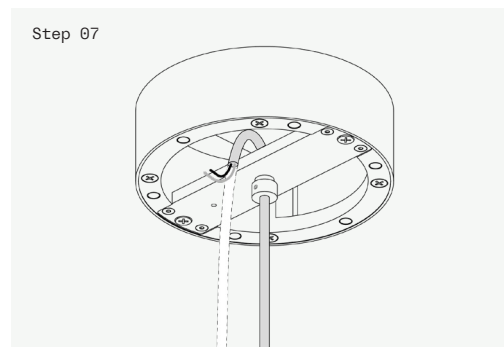

Step 04

Set the Pill To your desired height.

Step 05

Once the light is at your desired height tighten the grub screw to fix the cable in place. Be careful not to over tighten the grub.

Step 06

If you are installing multiple Pills we advise you install all ceiling attachments and set the heights before wiring the pendent to the driver.

Step 07

Cut off the excess cable and strip the cables. Wire these into the driver output via the terminal blocks provided.

Step 08

Cover the ceiling rose canopy with the two half's of the cover plates.

Step 01

Align the ceiling plate to the aces point to the ceiling void and feed the wires through the central hole.

Step 02

Fix the ceiling plate canopy to the ceiling using three 5mm wood screws. Fixings are not provide.
Note: Be sure the screws sit within the counter sink

Step 03

Loosen the grub screw in the side of the cable grip, feed the cable through and set the light to your desired height.
Note: you will still need to fix the mount collet to the ceiling mount.

Step 04

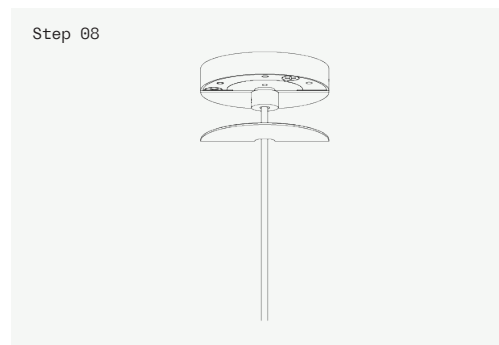

Set the Pill To your desired height.

Step 05

Once the light is at the desired light, fix in place by tightening the grub screw in the side of the cable grip. Then cut the excess cable off and wire the chord to the driver. Driver need to be stored within ceiling void or within 8m of the light.

Step 06

If you are installing multiple Pills we advise you install all ceiling attachments and set the heights before wiring the pendent to the driver.

Step 07

Attach the collet to the mount by screwing in the mount collet.
Note: Use the tool provided to tighten the mount collet in to place.

Step 08

Cover the ceiling rose canopy with the two half's of the cover plates.
