Technical and Product Description	Almendra is a modular suspended lighting system providing diffused light emission, available in linear and organic leaf-like compositions. Each lighting unit contains an integrated Edge Lighting technology and can rotate up to a 60¬ angle to change the direction of the light emitted. The product has been designed according to the International Sustainability and Carbon Certification (ISCC) standards. It is assembled without glued components so that it can be completely separated for easy recycling. Almendra Linear: The linear module can be set to obtain multiple configurations with 3, 4 or 6 lights, which can be positioned downwards or upwards.
