
LEE BROOM

Lee Broom is one of the world's leading lighting and furniture designers and a premium global luxury design brand. Established in London in 2007, he has created over 150 lighting products, furniture pieces and accessories all designed and manufactured under the Lee Broom brand.

His creations combine classicism and modernity all with an unexpected edge and can be seen in homes, restaurants and hotels across the world as well as gracing magazine covers and newspapers internationally. His collections presented in Milan, New York and London have become highly anticipated dynamic exhibitions influenced by Lee's theatre and fashion background.

Lee Broom's designs combine craft, heritage and modernity. Known for pushing the boundaries of how materials can be used he reinterprets them in new and contemporary ways, always with an unexpected edge.

The collections are all produced in house in the Lee Broom factory in London, allowing immediate shipping for key lighting collections and the creation of bespoke designs.

The images in this brochure highlights our lighting and furniture collections as featured within interior design projects by our network of clients and interior projects designed by Lee Broom.
