Lee Broom is one of the UK's leading product designers and a premium global design brand. With his highly original brand of luxury furniture and lighting designs, his work is recognised and retailed across the globe. Since founding the company in 2007, he has created over 150 furniture, accessory and lighting pieces, all of which are designed and retailed under the Lee Broom brand and produced and assembled in house at the Lee Broom factory in East London.

Lee Broom's designs can be seen in hotels, restaurants and homes across the world as well as on magazine covers and in newspapers internationally. His designs are both unique yet familiar as he takes classic styles and reinterprets them in new and contemporary ways with an unexpected edge.

Taking inspiration from his background in fashion design, he strives to embrace and explore new themes while keeping an overarching house style. Using the highest quality materials, combined with the latest technology, Lee Broom constantly evolves and innovates, resulting in his signature mix of classicism and modernity.

Lee Broom has won over 40 awards, including the prestigious British Designer of the Year Award and The Queen's Award for Enterprise presented by Her Majesty Queen Elizabeth at Buckingham Palace. In 2022, Rizzoli published Broom's first monograph 'Fashioning Design', a book which spans the designer's career and features contributions from Stephen Jones, Christian Louboutin, Kelly Wearstler and Dame Vivienne Westwood.

Presenting his collections each year in Milan, New York and London Design Weeks, he has gained a reputation for creating conceptual dynamic installations which are surreal, experiential and always unexpected. The Guardian commented, "Lee Broom is to furniture what Marc Jacobs or Tom Ford are to fashion."

Making design a successful global business, Lee Broom's products are retailed in over 200 stores in 50 countries around the world alongside his own flagship showrooms in London and New York.

LIGHTING

GEMINI

Gemini explores the classic characteristics of the astrological sign as well as serving a nod to the equipment, crucibles and flasks used in alchemical workshops. This elegant light fixture is a piece of two opposing halves which connect asymmetrically to create one linear illuminated product. To be hung horizontally or vertically, Gemini is formed of an illuminated capsule which is sliced and shifted to reveal a brushed brass fascia, sharing similar characteristics to Broom's iconic Crescent Light where every element of construction is hidden. Referencing the refinement of art deco, combined with inventive modernism, the appeal of Gemini lies in the beauty of its balance and the simplicity of its lines. Gemini can be installed in multiples, expanding horizontally and vertically to create bespoke constellations of light with extensive adaptations.

MYTHOS

Inspired by the Greek mythological tale of Prometheus bound to his chains, Mythos is a brass pendant light formed of two sculptural interconnected links capturing an illuminated glass orb. Suspended from a hand-stitched leather strap which acts as a sling for the links, concealed connections make it almost impossible to determine how the orb generates its illumination. A single link version with braided cable is also available, which can be hung as individual pendants or suspended as a three-piece chandelier. An elegant surface mounted wall light completes the collection, with a single link cradling an illuminated orb. Different when viewed from every angle, Mythos possesses both linear and curvaceous qualities, allowing the illumination of the sphere to refract in the brass whilst nestled in its curves. Produced in both brushed brass and blackened brass, Mythos is distinguished by its classic character

SOLSTICE

Solstice references the prehistoric monument Stonehenge and its spiritual rituals around the Summer and Winter Solstices. The illuminated opal glass globe of Solstice alludes to the sun, and the square brass structure which encases the globe references the monolithic form of the stone. Taking cues from 1960s lighting design, Solstice is where mid-century meets midsummer. Created as a single pendant, multiple fixtures can also be connected to create a tower of light comprising of two or three globes. And just as the earth rotates and the sun moves with the celestial sphere, each Solstice can be rotated creating your own heavenly formation. Constructed from brushed brass in a classic or blackened finish, Solstice has also been imagined as a wall light which stands elegantly poised as it meets the surface of the wall.

DESIGNING YOUR WORLD

KING

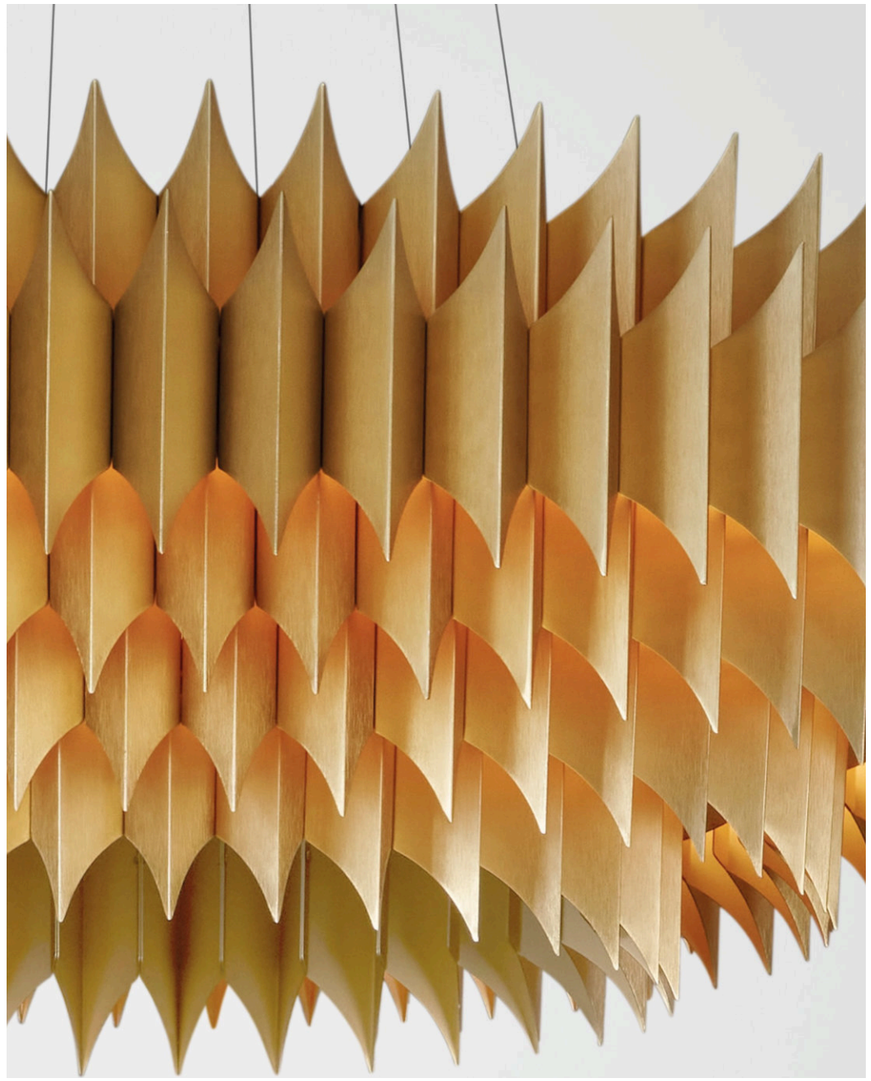

King is a majestic chandelier of significant proportions which intersects the boundaries of art and design. King is formed of individual brushed metal leaves which have been folded, tapered and brushed by hand to create multiple tiered rings, each concealing a hidden illuminated glow which envelopes the golden leaves, casting shadows and light. A sculpture in its own right, King was envisioned around folklore and the legend of King Arthur, hence its crown-like appearance. Its medieval characteristics have been fused with a semblance of brutalism, which makes King striking when dimmed and resplendent when illuminated. King is handcrafted in two sizes including a diameter 90cm (35 ⅜ in) and an even grander diameter 120cm (47 ½ in).

HAIL

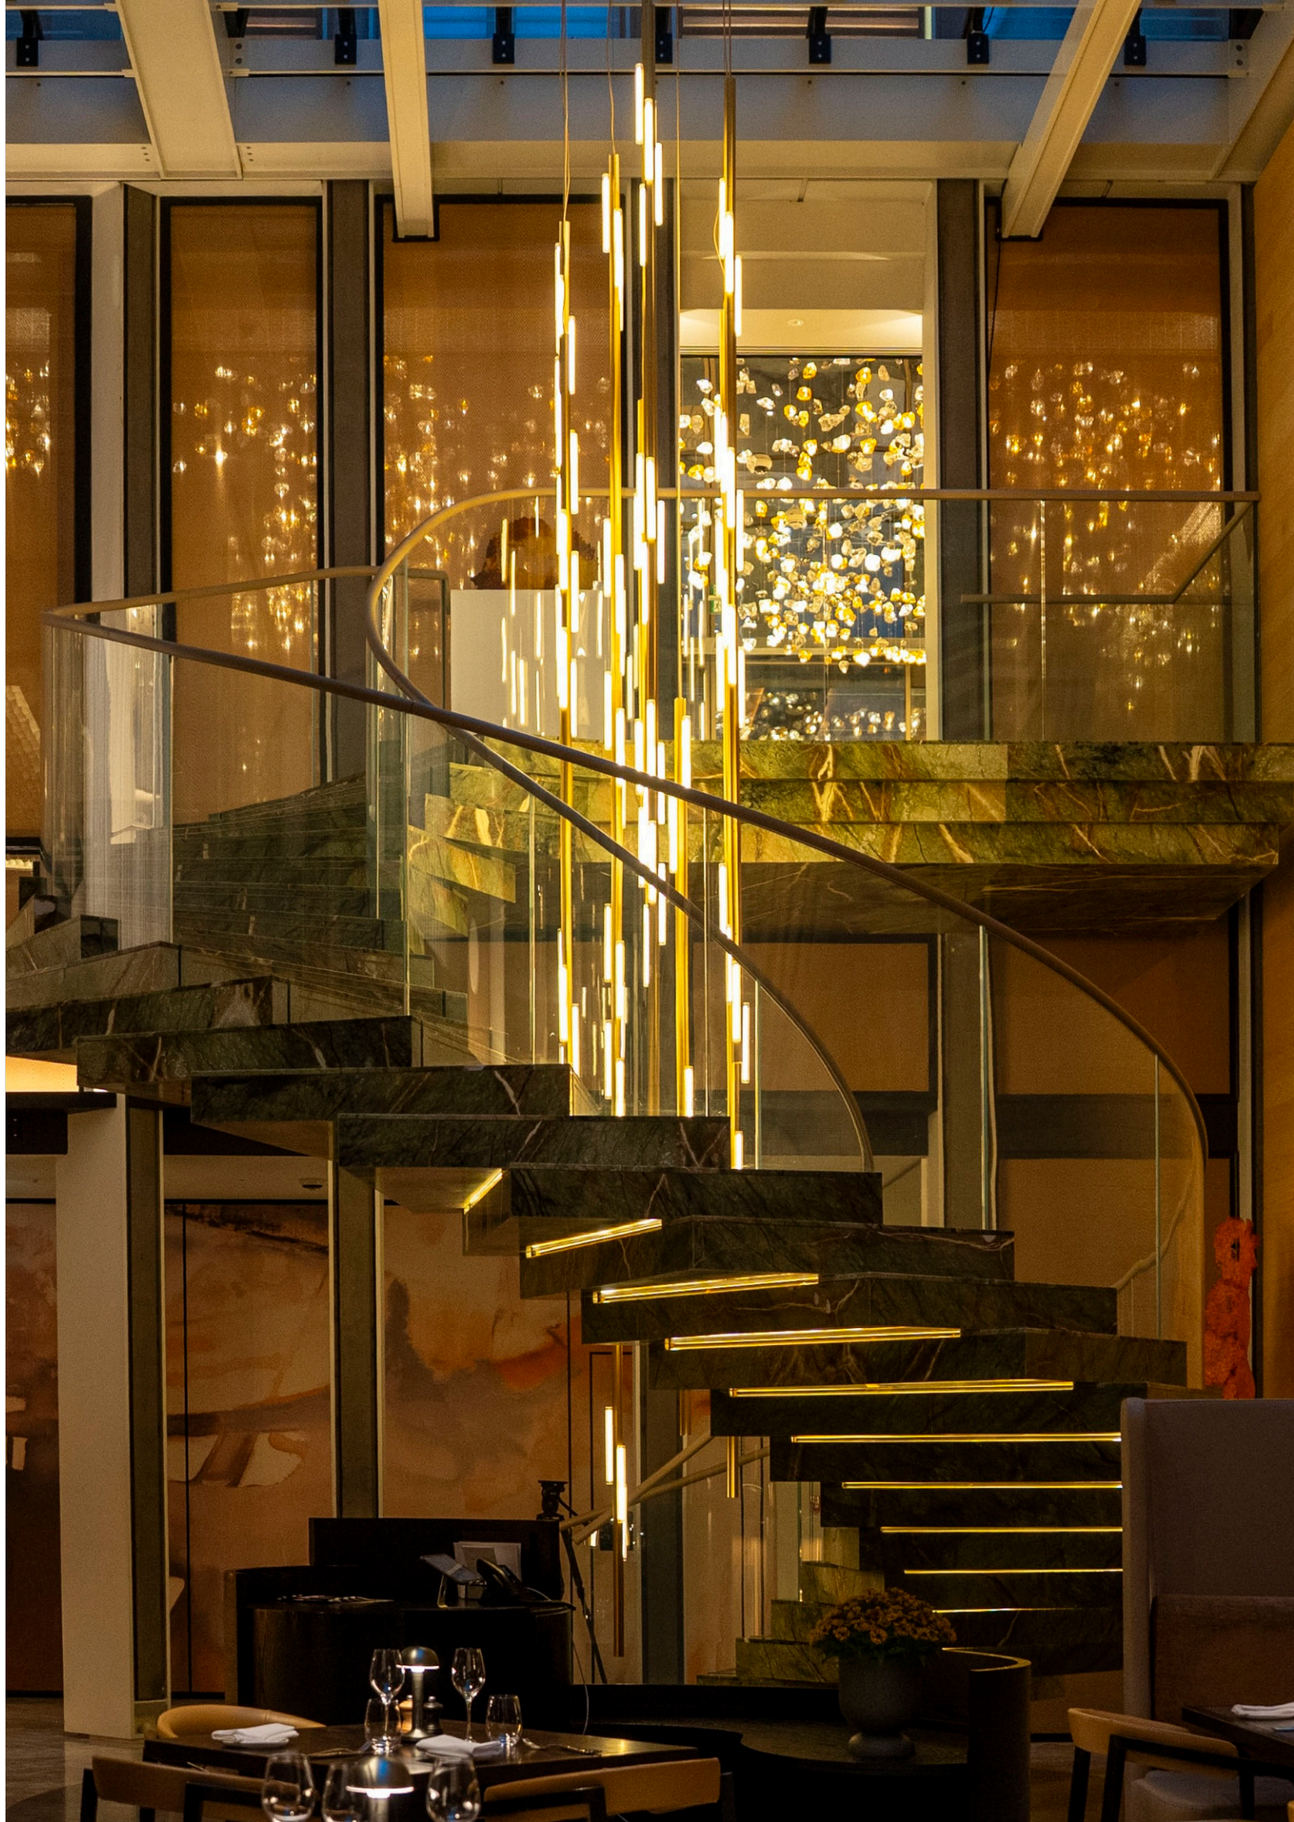

Hail is inspired by the shards of light and shadow often experienced from lancet windows in vast church arches. Available in three standard sizes in a gold, silver or bronze brushed finish, Hail has an elongated fluted form fabricated in aluminium with asymmetrically positioned reeded glass lightbulbs placed along its structure. The lights can also be connected to create unique customisable configurations.

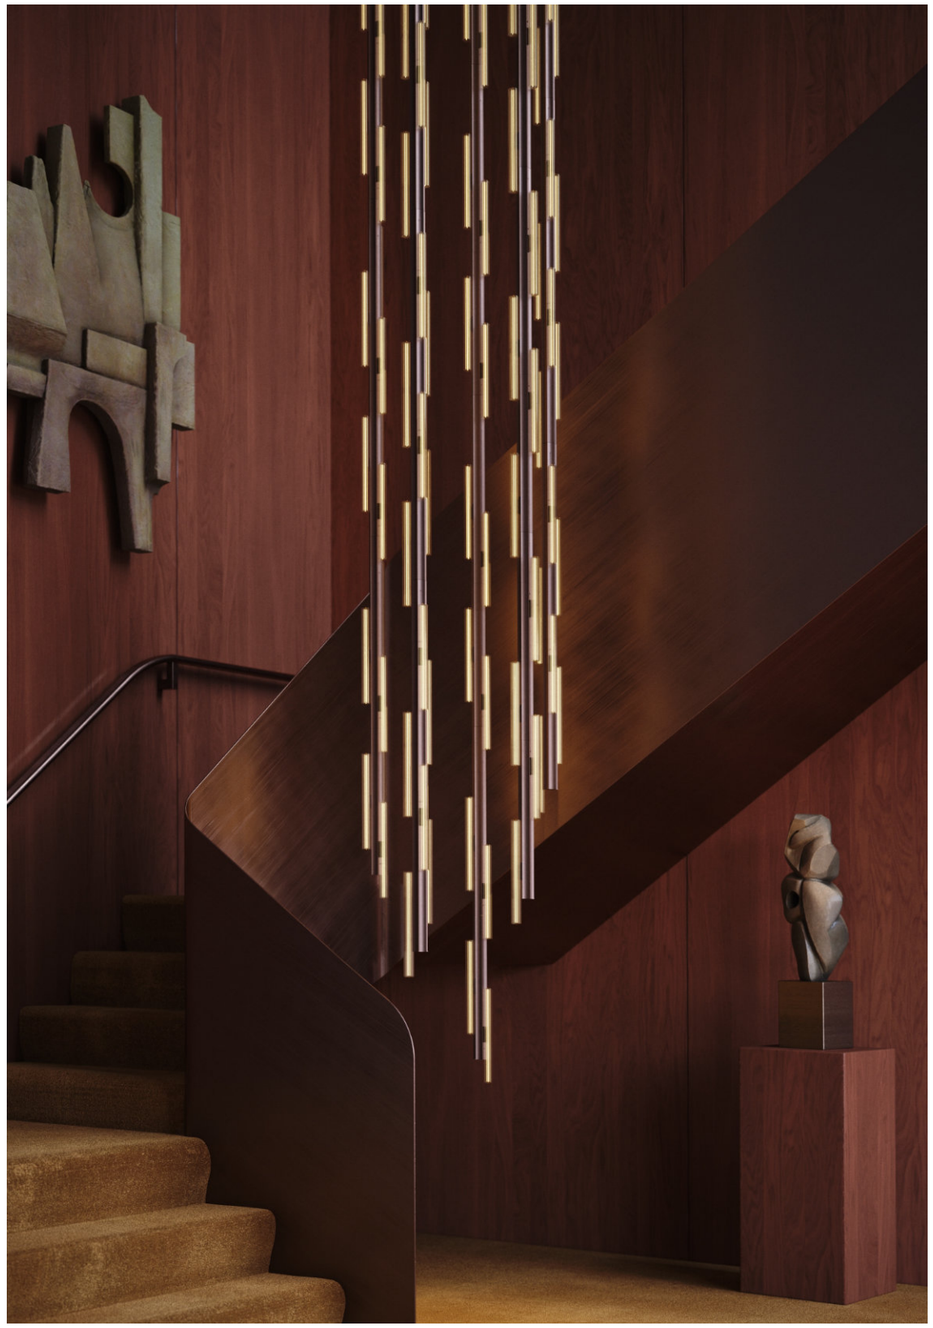

VESPER

Vesper is inspired by the simple geometric lines of Brutalist sculpture and modernist cathedral lighting. Formed with extruded aluminium and available in anodized gold, silver, or bronze, Vesper explores the delicate balance and interconnection of its rectangular cubes that are seamlessly connected by illuminated spheres. The light sculpture, which is suspended by cables, is available in both Duo and Quattro versions.

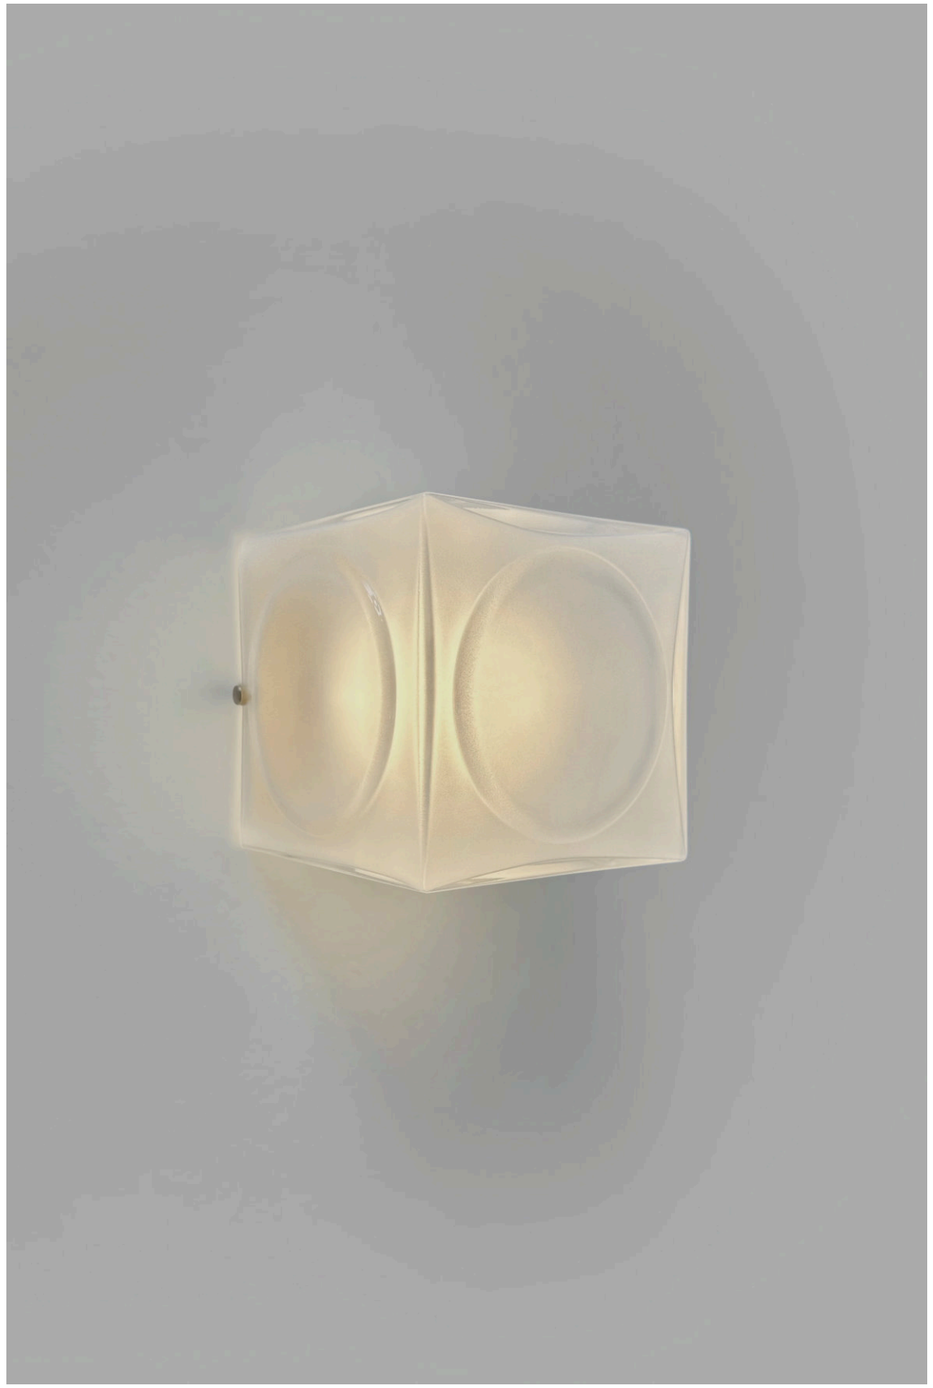

CHANT

Inspired by the pressed glass bricks often used as an alternative to stained glass in places of worship during the 1970s, Chant is formed of blown glass cubes with a pronounced circular detail in either clear or frosted glass. Constructed in square configurations, the glass cubes connect to form glowing brick-like chandeliers in single or two tiers. Chant is also available as a single surface mounted light fixture for the ceiling or wall.

CHANT PORTABLE

The Chant Portable Table Lamp is a sculptural glass object that elegantly balances form and function, drawing inspiration from the architectural glass blocks of the 1970s. Hand-blown in glass, the lamp features a bold square profile softened by an indented circular motif on each side, offering a refined nod to both nostalgic and modernism.

Produced in the UK at the Lee Broom London factory, Chant is available in both frosted and clear glass, with three base finishes in brushed gold, brushed silver, and brushed bronze.

Designed for seamless transition between indoor and outdoor settings, this wireless, battery operated lamp is fully weather-resistant and can remain outdoors in wet or dry conditions. Chant also has four levels of dimming and up to 40 hours of illumination on its lowest setting.

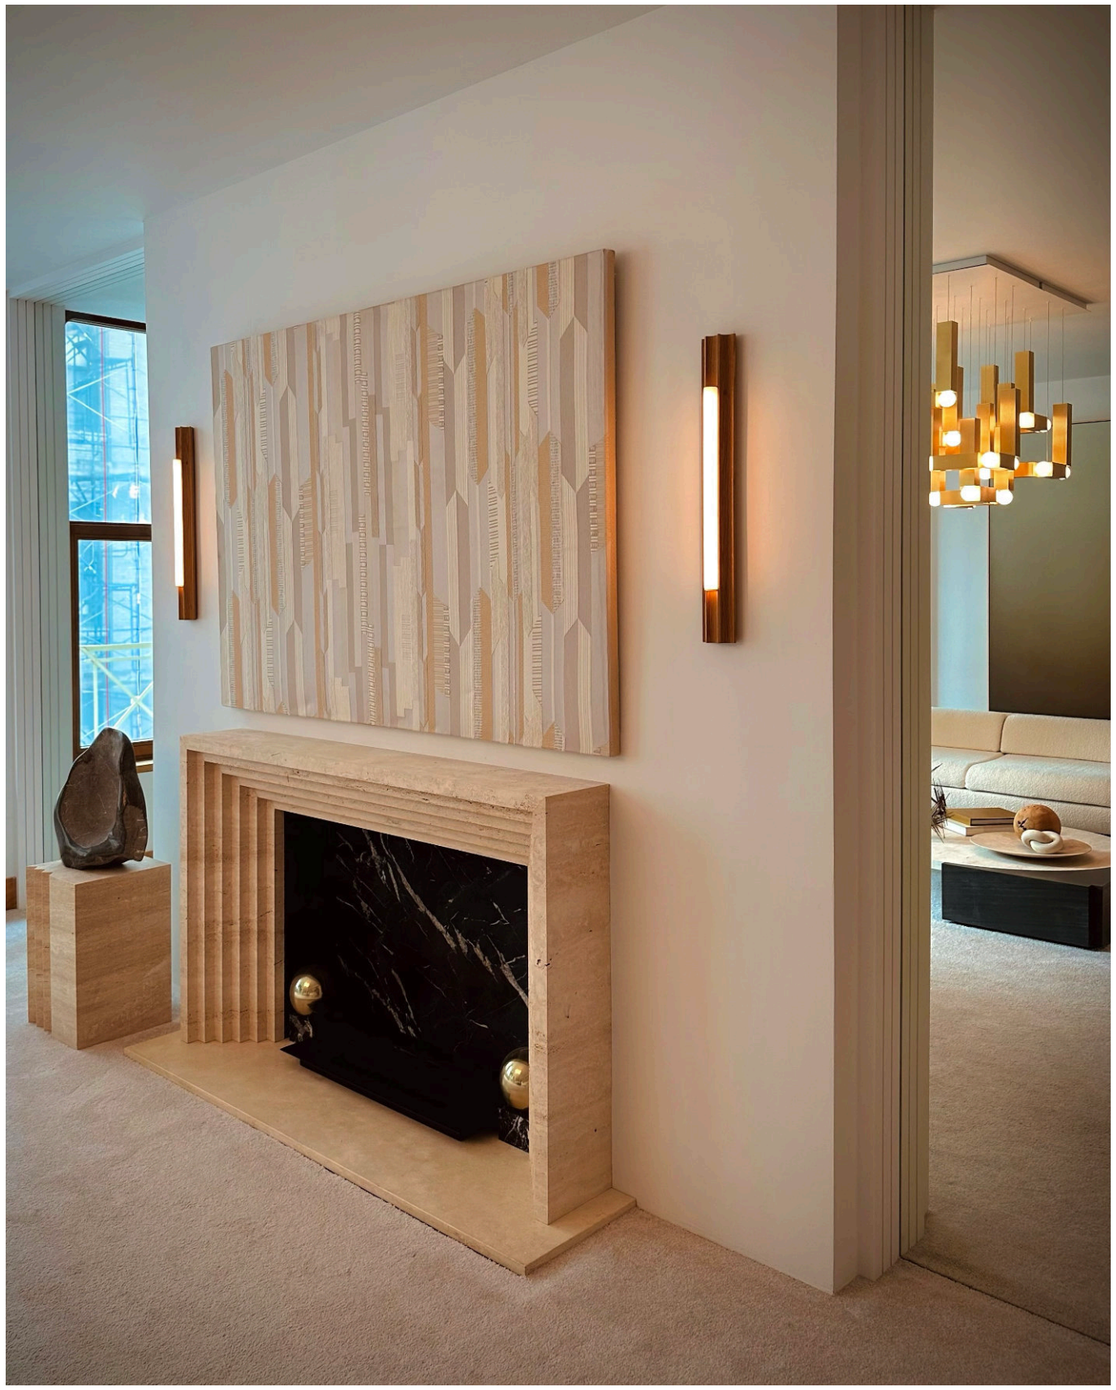

ALTAR

Altar is an exploration into the angular forms of Mid-century churches and altars, which often looked to warmer natural materials for fonts and pews. Altar's elegant, fluted form is carved from solid oak and completed with an illuminated tube seamlessly nestled in its architectural grooves. The light available in two sizes, can be suspended from a cable or surface mounted to the ceiling. In addition to the pendant fixtures, Altar is also available as a wall light.

PANTHEUM

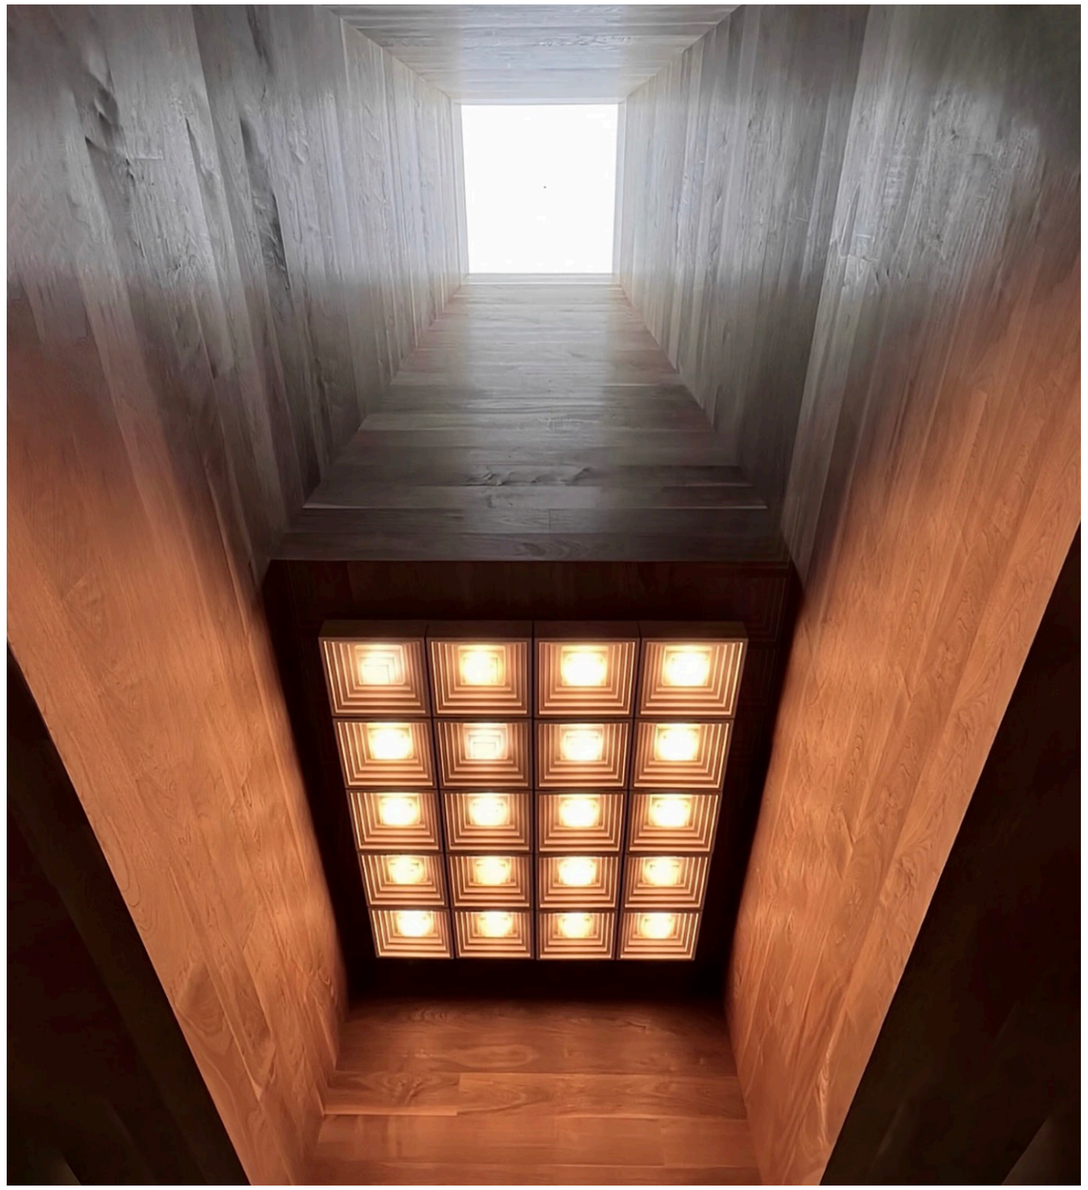

Pantheum is inspired by the distinctive concrete ceiling of Rome's ancient temple, The Pantheon, as well as the clean lines and geometry of Brutalist architecture. Cast by hand in Jesmonite, its silhouette is a stepped tile-like square that is then sand blasted to give its rough sandstone hewn surface. Pantheum is a surface light, each can be hung on its own or composed in symmetrical clusters to create a ceiling or wall

REQUIEM

Requiem is an ethereal series of limited-edition pieces. Each sculpted by hand, by Lee Broom in our London factory. The collection takes inspiration from the marble drapery on ancient statues and sepulchral sculptures. Each piece appears weightless and fluid but is solid in form, made by hand-draping fabrics in plaster through and around illuminated glass. These ghostly forms are then sculpted with more plaster into their final shape and set until solid. The effect is one of fragile drapery that appears to capture a floating light source. To celebrate the 15-year anniversary of Lee Broom, each of the four limited edition Requiem designs is limited to 15 pieces.

ORION

Orion comprises modular lights with opposing illuminated and solid polished gold, gunmetal or aged brass spheres along with illuminated and solid polished gold, gunmetal or aged brass tubes. Individually, these can be hung horizontally or vertically and when used in multiples create bespoke constellations of light with infinite adaptations. The lights are technically innovative with concealed LEDs that create a warm glow reflecting against the polished globes and tubes. The celestial-inspired collection has been designed around sculptural and spherical forms, which are both conceptual yet elegant.

POLLOCK

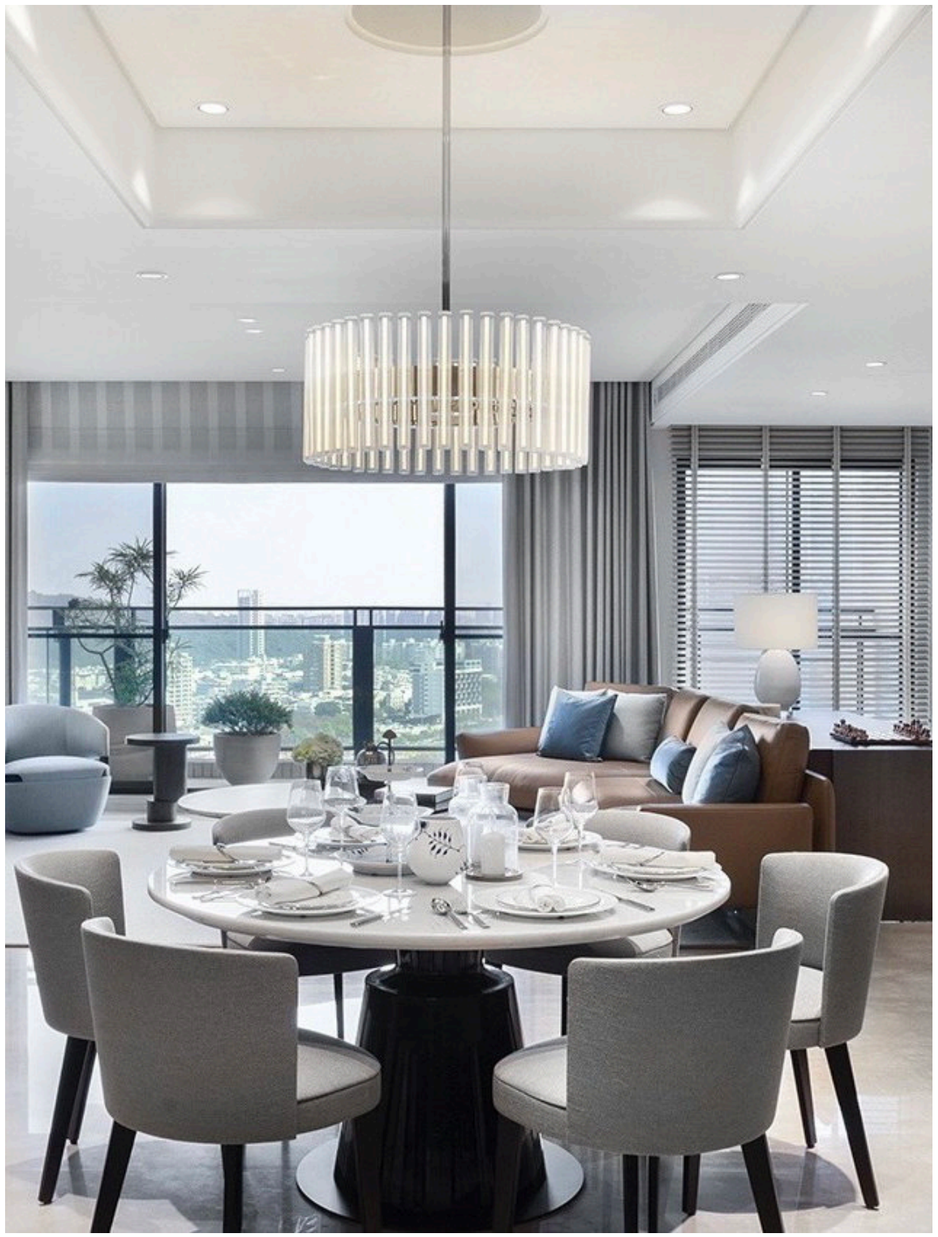

AURORA

A chandelier of multiple adaptations which projects layers of ethereal rings of light created from linear LED light bulbs. Created and produced by Lee Broom, the hand-blown glass bulbs contain a perpendicular LED filament which refracts against the vertical lines of the reeded glass. En masse and reflecting in the mirror- polished stainless steel rings, the overall effect ensues a glowing aura. Aurora is a scalable chandelier in which rings ranging from a 32cm (12 ⅝ in) to a 109cm (42 ⅞ in) diameter can be installed individually or connected together to create a tailored chandelier.

ECLIPSE

Eclipse is a lighting collection in both its name and inspiration. Mirror-polished stainless steel and acrylic discs interact, dissect and obscure, which both eclipses and reveals its illumination to the viewer at the same time. Available as a single pendant light, chandelier and table lamp, Eclipse has a sculptural silhouette with a mobile-like quality that changes at every angle. Finished in polished chrome or polished gold, Eclipse acts as a mirror, reflecting and refracting light and featuring LED lighting systems custom-designed and developed by Lee Broom. Using the refractive properties of an etched 10mm solid acrylic core and concealed LED technology to create a diffused halo, the design highlights Lee Broom's technical craftsmanship and innovation.

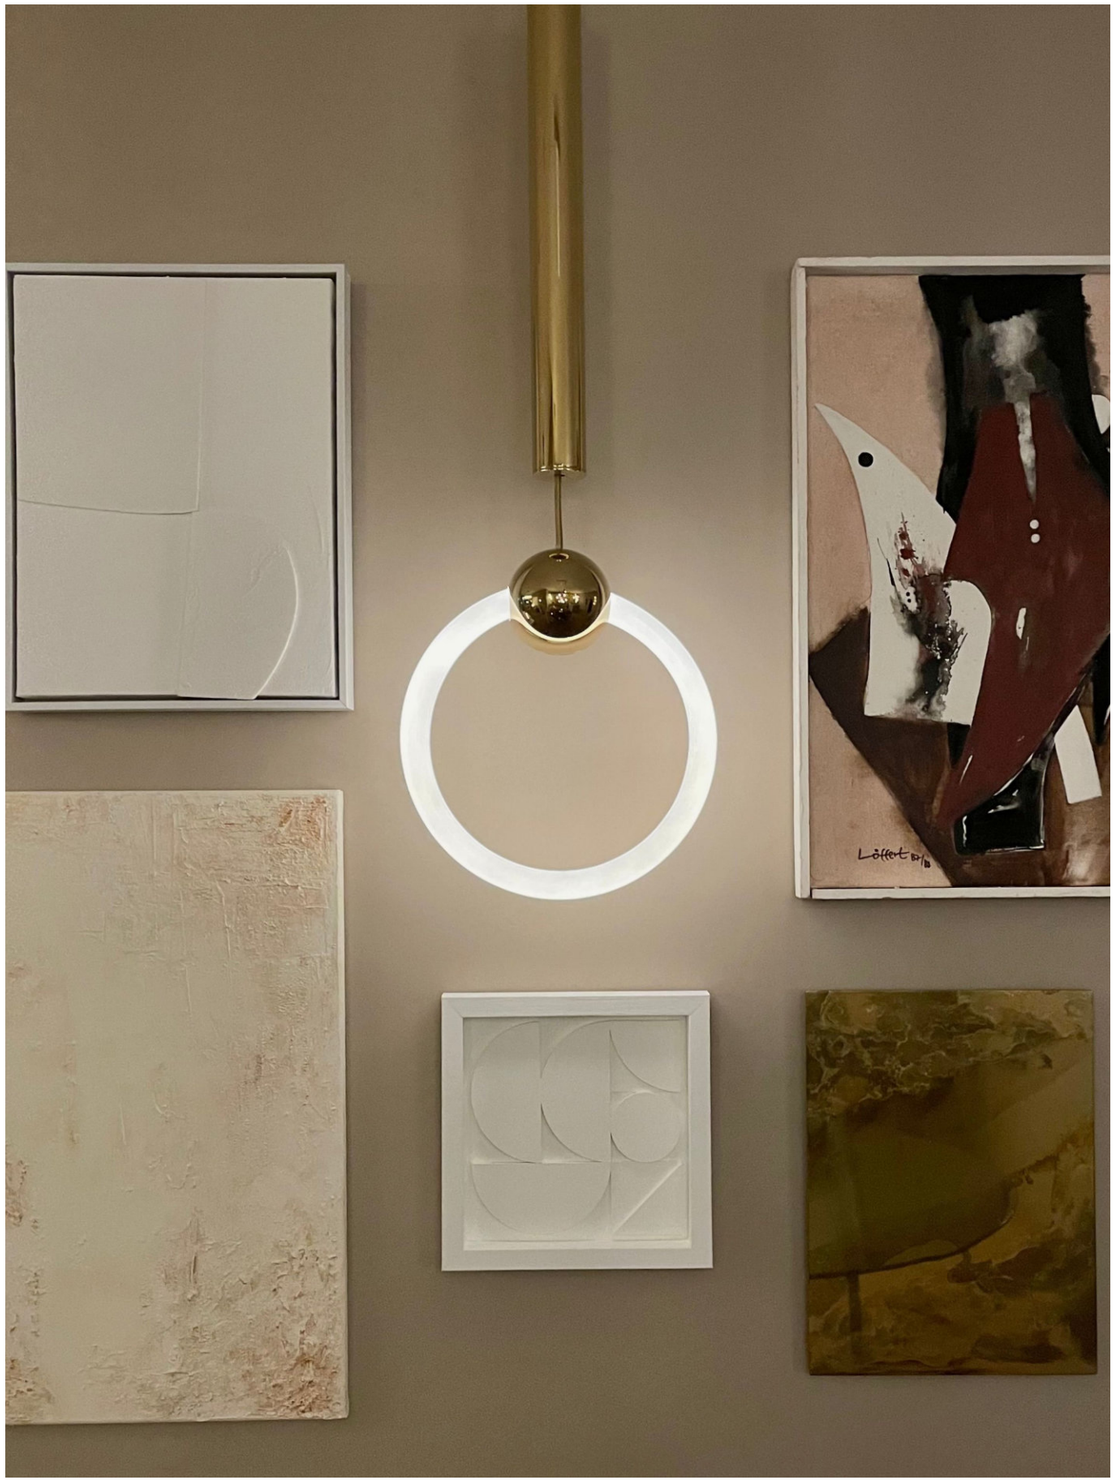

RING

The iconic Ring Light by Lee Broom is relaunched as a brand new full-LED product for 2023. Featuring a polished gold sphere pierced by a dimmable LED tube to form the striking ring of light. A pendant of simplicity and elegance.

CRESCENT

A new twist on the classic globe light, Crescent Light is an illuminated sphere sliced asymmetrically in half to reveal a crescent-shaped brushed brass or blackened brass fascia. At 40cm / 15 ¾ inch diameter and containing a high power LED bulb, Crescent Light has presence and luminosity, seamlessly combining the solid and the lucent. Also available is the Crescent Table Lamp, nestling the sliced sphere on a ring of brushed brass.

MINI CRESCENT

A miniature version of the Crescent Light, Mini Crescent is a 20cm / 7 ⅞ in sphere sliced asymmetrically in half to reveal a crescent-shaped brushed brass or blackened brass fascia. Further options available include Mini Crescent Chandeliers, composed of three or five pendants hung from a brushed brass canopy and the Mini Crescent Ceiling Light, which allows the shade to be mounted directly on the ceiling. Completing the family is the Mini Crescent Table Lamp.

FULCRUM

Designed from the exploration of pivots and supports, Fulcrum Light is a slimline and elegant pendant of polished gold, polished chrome or matte black cylinders suspended around a central sphere. The exposed light bulb symmetrically mimics the silhouette of the sphere. The Fulcrum is also available as a three piece chandelier and five piece chandelier with matching finish canopy.

CAROUSEL

Inspired by the merry-go-round ride of a traditional fairground, Carousel is a pendant light with a heavyweight presence that floats gently in space. Cylinders of polished gunmetal, polished gold, polished chrome or matte black, each house an inset LED lighting element resulting in a spectacular yet playful ring of light. Originally released in two sizes - Carousel 60cm / 23 ⅝ inches featuring 30 LED light bulbs and Carousel XL at 120cm / 47 ¼ inches with 60 LEDs, two additional sizes Carousel Medium 80cm / 31 ½ inches with 40 LEDs and Carousel Large 100cm / 39 ⅜ inches with 50 LEDs have been added to the range. All Carousels are suspended from a matching circular canopy by steel tensile wires.

LENS FLAIR

Inspired by telescopic lenses and the technique of horizontal and vertical refractions, Lens Flair is a product comprising two halves, seamlessly combining the solid and the transparent. A detailed cross-cut lens emits a soft deflected light, which is juxtaposed by a contemporary solid casing in brushed brass or matte black finishes. This striking new piece is available as a Pendant Light and Table Lamp. Lens Flair makes a bold statement by itself, or multiple pendants can be hung to create a more impactful installation.

LITTLE LENS FLAIR

At 20cm (7 ⅞ in), Little Lens Flair is a scaled-down new adaptation of the popular Lens Flair collection. Inspired by telescopic lenses and the art of horizontal and vertical refractions, Little Lens Flair is a piece of two halves, seamlessly combining the solid and the transparent. A detailed cross-cut lens emits a soft deflected light, which is juxtaposed by contemporary solid casing in brushed brass or matte black finishes. The beautiful adaptable piece is available as a Pendant

CHAMBER

Housing a sculptural Carrara marble diffuser within a crystalline glass vessel, Chamber expresses the unexpected translucent qualities of marble in a compelling decorative pendant. With its gentle luminosity and directional downlight, Chamber is available in two sizes and lends itself to being hung in clusters as well as individually. Also available as a three piece chandelier and five piece chandelier with satin white canopy.

TUBE

Skillfully milled from a single piece of Carrara marble and finished at each end with bands of brushed brass or polished chrome, Tube contains a strip of LED light source resulting in what appears to be a solid length of warm glowing stone. The unique veins of each piece of marble means no two lights are exactly the same. A handcrafted twist on the traditional fluorescent tube light. Also available as a wall mounted light.

CRYSTAL TUBE

Composed of a decoratively patterned length of hand-cut glass capped at each end with brushed brass or polished chrome, Crystal Tube contains a slender LED light source resulting in a sparkling beam of light. A luxurious reimagining of the standard fluorescent tube light, Crystal Tube is suspended from both ends by a thin steel tensile wire allowing it to be hung horizontally. Also available as a wall mounted light.

CRYSTAL BULB

Taking inspiration from the delicate craftsmanship of crystal cutting, Crystal Bulb combines industrial influences with decorative qualities, transforming the everyday light bulb into a beautiful ornamental light fitting. Each Crystal Bulb is handcrafted using traditional techniques and hand cut with a classic crystal pattern inspired by traditional whiskey glasses and decanters. Crystal Bulb is available in a Clear or Frosted finish and the collection includes a brushed brass or polished chrome pendant, polished gold table lamp, three piece chandelier and five piece chandelier. Crystal Bulb is also available as a brushed brass wall light and ceiling light. The Crystal Bulb features a warm white LED, which is replaceable.

DECANTERLIGHT

Crafted from hand cut crystal, Decanterlights are inspired by the vintage drinks decanters found in a traditional British drawing room. Referencing three classic decanter shapes, the Square, Bell and Tulip pendants produce a warm, welcoming glow and refracted light casts intricate shadows on surrounding surfaces. A five piece and three piece chandelier suspends a selected mix of shades at different heights to create a stunning lighting centerpiece.

ACID MARBLE

A layer of white Carrara marble and acid yellow tinted optical acrylic are sandwiched together to form an illuminated circular diffuser for the sculptural Acid Marble Table Lamp. Set into a solid Nero Marquina marble base, the veins of the Carrara marble are visible through the optical disc allowing the marble to appear yellow, giving this very classic material a playful twist.

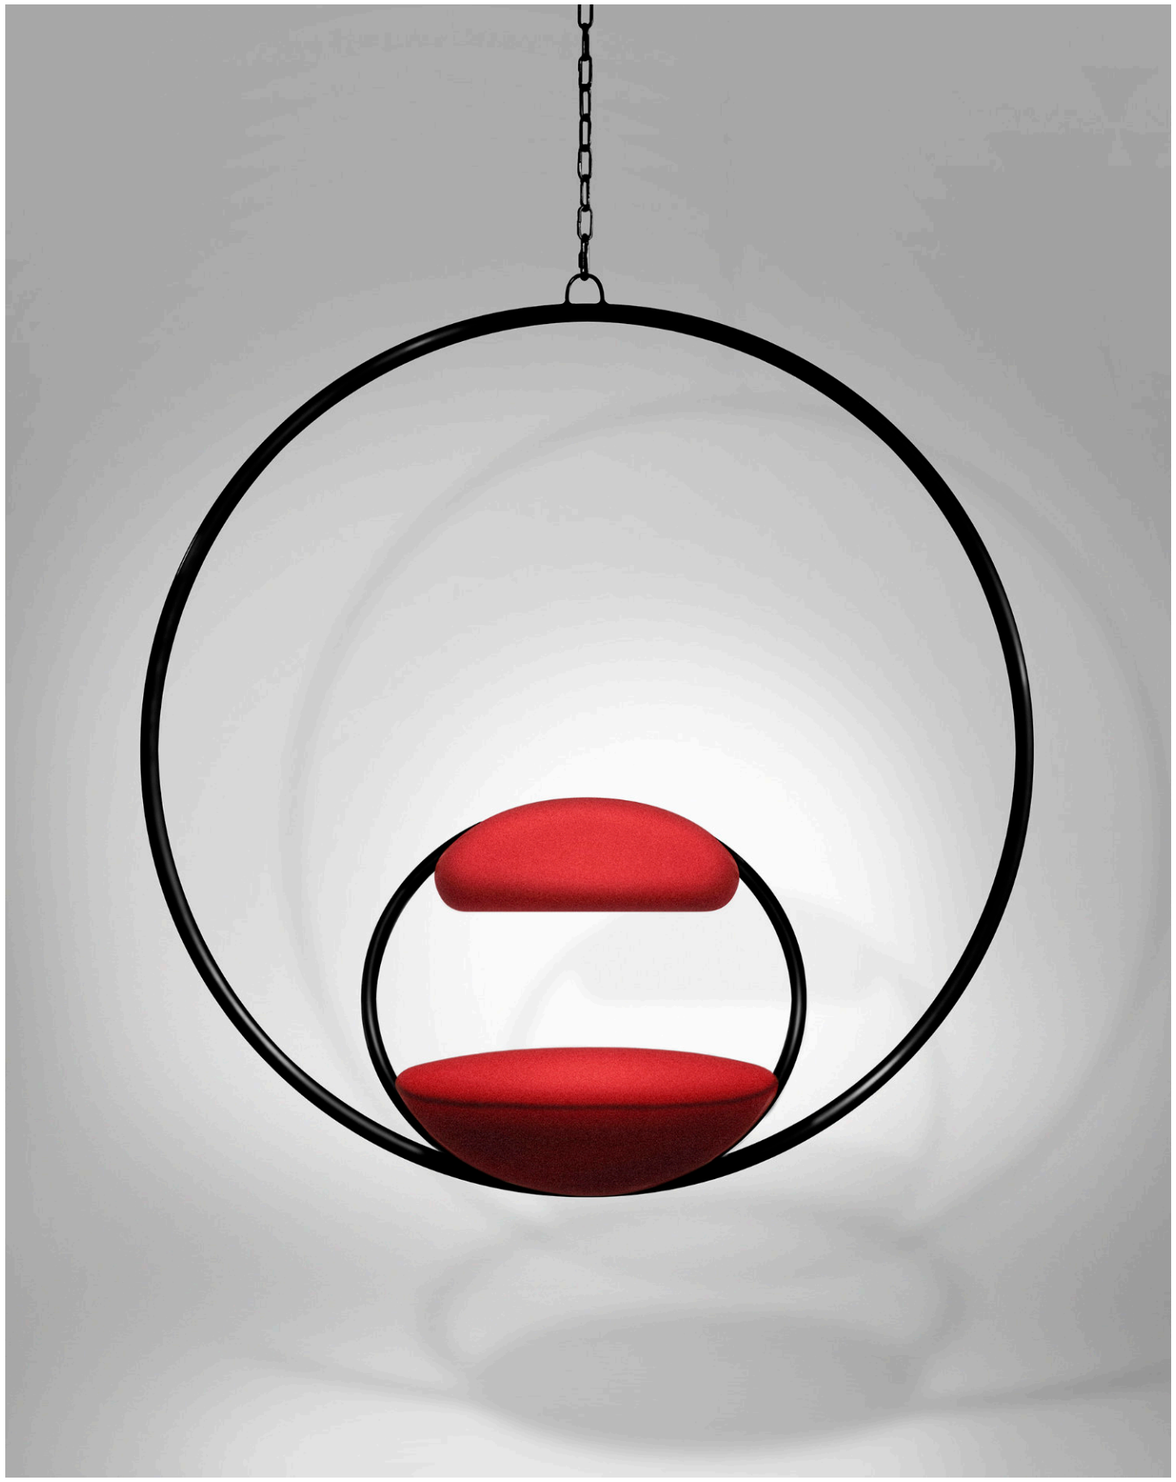

FURNITURE

HANGING HOOP CHAIR

Suspended by a chain, two circular steel hoops join to create Hanging Hoop Chair, a modern swing chair with an iconic outline. The angled inner hoop supports a padded backrest that is perfectly aligned with the hemispherical seat, both of which are upholstered in Kvadrat wool. The frame is available in matte black and brushed brass plated finishes.

MUSICO CHAIR

The Musico Chair features an original silhouette inspired by Lee Broom's long-held passion for mid-century design and, perhaps more significantly, his great love of classical music, which plays an integral part in his design process. Reminiscent of the coils and wraps of musical instruments, its contours have been created by three continuous hand-bent, hand-polished and plated tubes, which form a seamless circular-like embrace around the chair's upholstered seat and back.

The Chair comes in three finishes including satin brass, polished chrome and matte black. A wide selection of fabrics are also available for upholstery including wool produced in the UK, leather and velvet. Customers own material can also be requested.

TRIBECA TABLES

The Tribeca Tables are a series of sculptural side and coffee tables, which appear to defy gravity. Crafted in black silk marble and travertine with a stepped detail that reflects the soaring local architecture, the smooth round table top cantilevers over a monolithic square base, balancing perfectly.

Dior

WHITE STREET SOFA

The White Street Sofa highlights Lee Broom's long-held fascination with symmetry and seamlessness. This architectural, streamlined, modular piece can be arranged in multiple configurations and is effortlessly connected by sculpted armrests, corner or side tables, each produced in black or white ash. Shown in a sumptuous ivory bouclé by Dedar, but available in multiple colours, the sofa, with its expansive and curved back, appears to float, anchored only by its connectors. The White Street sofa is available as a two seat, three seat and corner configuration sofa.

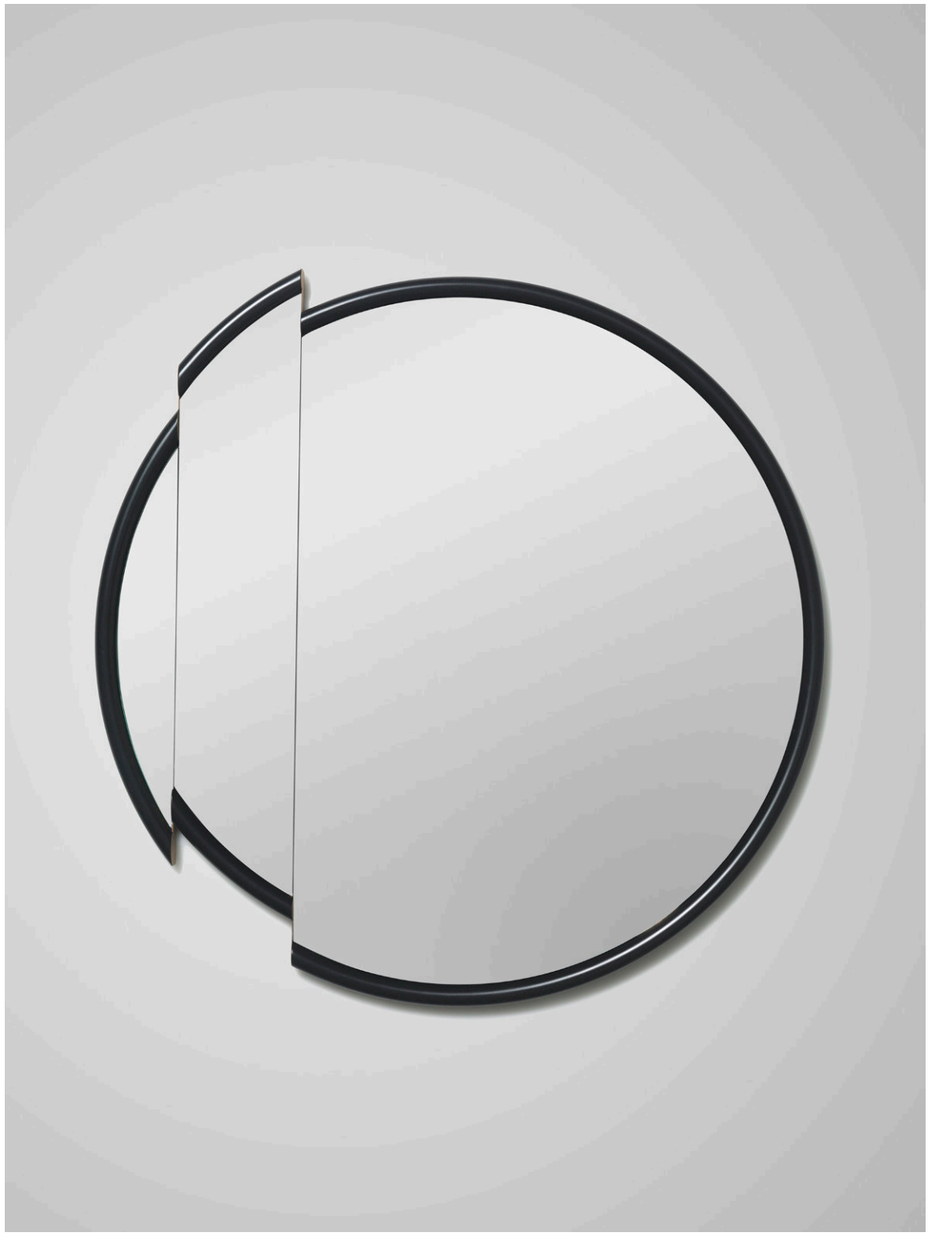

TIME MACHINE

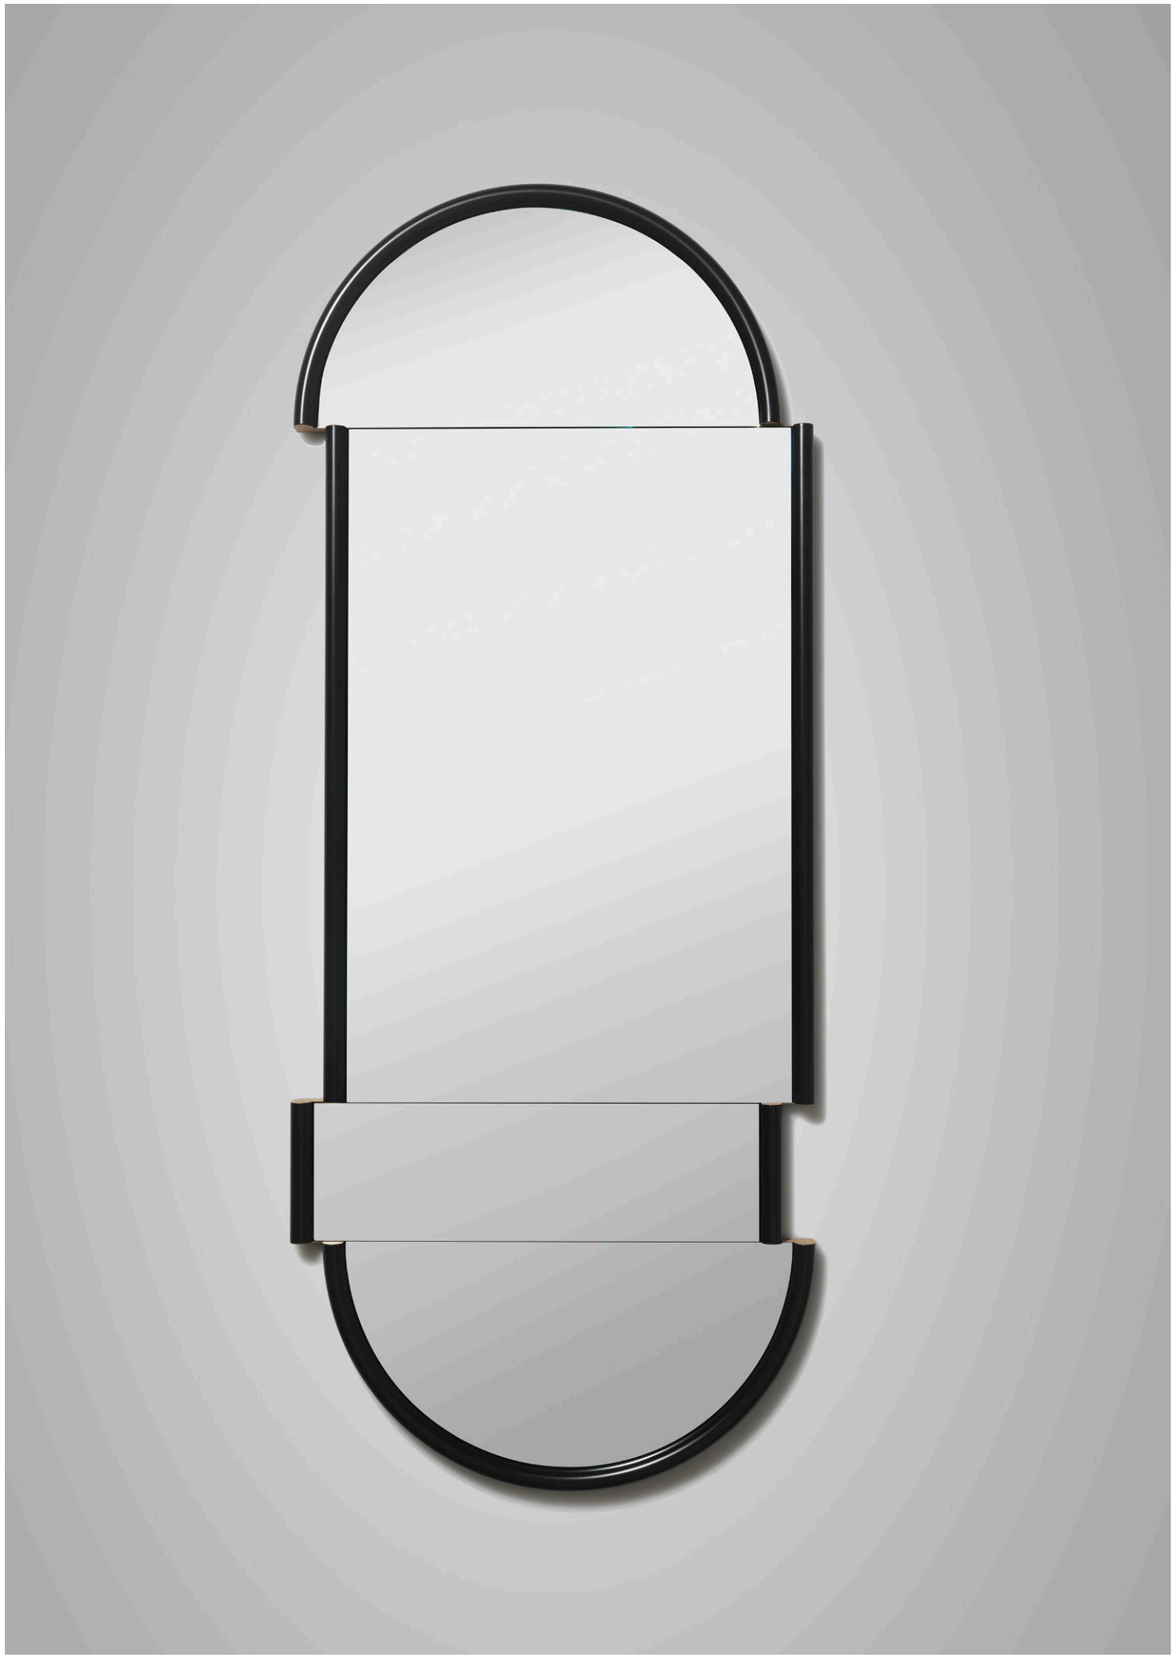

Time Machine is an exclusive statuesque marble grandfather clock measuring 168.5cm / 66 ⅜ inches high. Hand-crafted from Carrara marble, the monolithic and commanding structure features a traditional engineered clock mechanism with solid brass pendulum, weight and hands. Limited to an edition of 10.

SPLIT MIRROR

A precision cut mirror slice, shifted from its original position, reveals an oak trimmed section of the black frame on Split Mirror. This modern wall mirror has a distinct personality. Both the round and long variations of Split Mirror have been lacquered in a matte black finish to complement the oak trim.

ACCESSORIES

SCENTED CANDLE

The Lee Broom scented candle comprises of two separate elements that fit seamlessly together. An elegant cubist candle holder, hand-crafted in solid optical crystal and the metal vessel, finished in either polished gunmetal or gold which contains the candle itself. The candle glides smoothly into the crystal's interior to sit suspended perfectly within. Once the candle is finished, it can then be replaced with a new candle from the range.

Each candle is created using an environmentally friendly natural blend wax and an unbleached natural cotton wick, which has been hand-poured in the UK. The natural scents, which have been blended and developed with a French fragrance house,

WEDGWOOD X LEE BROOM

A prestige capsule collection of limited edition hand-crafted Jasperware vases and bowls, the Wedgwood by Lee Broom collection is a true showcase of craftsmanship and design. With silhouettes and archetypal designs taken from Wedgwood's 250-year old archive, ornate detailing has been stripped back and the traditional Jasperware finish juxtaposed with postmodern elements to produce thoroughly cutting-edge versions of timeless classics limited to 15 editions of each of the

FULCRUM CANDLESTICK

Fulcrum is a sculptural and monolithic candlestick whose cylindrical stem appears to balance on a central sphere. Containing a large tea light, Fulcrum Candlestick is available in Travertine marble, white Carrara marble or black Nero Marquina marble. The small Fulcrum candlestick is 31cm / 12 ¼ inches tall and the large size is 40cm / 15 ¾ inches.
