MINI CRESCENT LIGHT - BULB INSTALLATION

1. UNSCREW AND REMOVE THE GRUB SCREW FROM THE TOP OF THE CRESCENT LIGHT DOME.
2. SEPARATE THE CRESCENT DOMES BY PUSHING THE LOWER DOME HALF UP SO IT IS FLUSH WITH THE HIGHER DOME.
3. GENTLY PULL THE DOMES APART.
4. FIT NEW BULB INTO LAMP HOLDER (25W MAX).
5. HOOK THE DOMES BACK TOGETHER. PUT THE TWO DOMES TOGETHER SO THEY ARE FLUSH AND THE TWO SQUARE HOOKS LOCATE IN THE TWO SQUARE HOLES. SLIDE THE DOME THAT HAS THE TWO SQUARE HOOKS DOWN SO THE HOOKS LOCATE IN POSITION.
6. INSERT THE GRUB SCREW BACK INTO THE TOP OF THE DOME TO ENSURE BOTH HALVES ARE FIXED SECURELY.
