

ORIENT

2 Sizes

The Orient pendant exudes sophistication, combining flawless light design with high-quality materials. The natural connection between the three components - the deep, vibrant copper, the dark grain of the rosewood top and the tightly woven black textile cord - create an elegant, organic mode of expression. The Orient has a rich history - designed in 1963 by Jo Hammerborg for renowned Danish lighting company Fog & Morup, and now, fifty years after its creation, it is being relaunched with close collaboration with the Hammerborg family.

ETL Approved. CLASS-IP20
