

ENG WARNING – RISK OF FIRE AND ELECTRIC SHOCK. THIS PRODUCT IS BEST INSTALLED BY A QUALIFIED ELECTRICIAN. INSTALL IN ACCORDANCE WITH CURRENT NEC WIRING REGULATIONS.

SUITABLE FOR DRY LOCATIONS ONLY

THE FITTING MUST BE GROUNDED. TURN OFF POWER AT THE MAIN FUSE BEFORE COMMENCING INSTALLATION.

FR ATTENTION – RISQUE D'INCENDIE, RISQUE DE CHOC.

CE PRODUIT DOIT ÊTRE INSTALLÉ SELON LE CODE D'INSTALLATION PERTINENT, PAR UNE PERSONNE QUI CONNAÎT BIEN LE PRODUIT ET SON FONCTIONNEMENT AINSI QUE LES RISQUES INHÉRENTS.

POUR EMBLEMENTS SECS SEULEMENT

L'APPAREIL DOIT ÊTRE MIS À LA TERRE. COUPEZ LE FUSIBLE PRINCIPAL AVANT DE COMMENCER L'INSTALLATION.

1. Prepare the fitting for installation- consulting the instructions and diagrams on the inside page. Once desired drop of pendant is established, the cable length may be shortened. If cable is desired length already, then skip to instruction point number 3. To shorten cable:-
2.
 - a. Establish required length of cable (ensuring there is some slack) before using wire cutters to cut.
 - b. Remove the outer insulation from the last 6" of the end of the cable, then remove the last 1/4" of inner sleeving from both cables to expose the wire.
 - c. Make sure that when stripping the outer cable no damage occurs to the interior cable.
3. This fitting should be installed on a 4" junction box (not supplied).
4. Open your existing junction box (if you do not have one in the desired position you will need to get an electrician to install one). If removing an existing fitting first, note all wiring connections: record which of the house wires is connected to the live, neutral and earth (ground) terminals.
5. Attach the fixing plate to your junction box using the two existing bolts.
6. In your junction box there should be two supply wires and one ground wire. Connect your new lamp to the electrical supply using supplied WAGO connectors or UL approved wire nuts (not supplied). Connect the live (hot) black wire from the power supply to the black conductor on the luminaire cable, then the white (neutral) wire to the white conductor on the luminaire cable and bare copper or green/yellow ground wire to the ground terminal or green/yellow wire connected to the fitting.

7. Support the fitting so that no strain is applied to the wiring when making the electrical connections. If necessary get a colleague to help.
8. See hanging instructions inside to complete the installation.
9. Fit the correct type and wattage of lamp (or less). Be careful not to overtighten the lamp.
10. Switch on at the fuse-board. Your light fitting is now ready for use.

Other Important Information

Switch off at mains before changing lamp(s). Never fit a lamp of greater wattage than recommended. Ensure children do not play with the light fitting. Dispose of old lamps carefully. Never leave a fitting without a lamp in position (or someone can accidentally touch the contacts). Adjust fitting only when power to the fitting is off and has been left to cool. If the electrical flex or electrical components become damaged at any point, power to the fitting should be disconnected immediately and not operated until the damaged parts are fixed/replaced. For use in dry, indoor environment only. Ensure the fitting does not come into contact with any liquids.

Cleaning and Maintenance

Metal finishes should only be cleaned with a soft, dry cloth. Do not use polishes or abrasives. Bone china can be cleaned with a soft damp cloth or with a diluted mild (non-abrasive) detergent. Switch off power to the fitting before cleaning.

Established in 1990, Original BTC manufactures relaxed, familiar lighting for traditional and contemporary homes. All products are hand-assembled in Oxford from high quality components, produced in the UK.

This product is made from Fine Bone China; take care when handling this product during installation.

Contents

Contents

- 1 Fixing Bracket
- 2 Ceiling Rose
- 3 7 x Fin Medium shade
- 4 4 x 5 way WAGO
- 5 1 x 2 way WAGO

Tools/Hardware Required

- Junction Box (6)
- Screwdriver

Installation Diagram

Hanging Instructions

Refer to diagram above.

STEP 1

- Work out the drop and arrangement of each shade, adjusting the drop by loosening the grub screw inside cord grips (F) where the cable enters the ceiling rose.

STEP 2

- Follow the instructions overleaf to shorten length of cable as required.

STEP 3

- Once each shade is in desired position, tighten the grub screw of cord grip to secure in position. Do not overtighten grub screw.

STEP 4

- Follow instructions overleaf to install fixing bracket (B) and connect fitting to main supply (see fig.2).

STEP 5

- The ceiling plate (G) can now be secured to the fixing bracket using the gallery screws (F), checking that all the wires are contained inside the ceiling plate/junction box and do not become trapped.
