Demolished building

LIGHT FROM WOOD

We locally source material from old water towers, fallen trees, demolished buildings, and sustainably-managed forests to build our modular LED fixtures by hand in NYC.

DECORATIVE WOOD OPTIONS

HEART PINE

Carefully selected from demolished buildings in and around New York, the Stickbulb Longleaf Pine is remarkable for red to golden brown tones and clearly defined, dense, old growth grain. Occasional nail holes and areas of discoloration speak to its rich history

WALNUT

Sourced locally from sustainably managed forests primarily in New York and Pennsylvania. Walnut is a timeless wood. With a rich, classic brown color, and occasional burl'd grain.

MAPLE

Sourced locally from sustainably managed forests primarily in New York and Pennsylvania. Characterized by a minimal and consistent grain and creamy-white color. Occasional knot or dark swirl.

REDWOOD

Majestic Sequoia Sempervirens or Redwood, originating from the legendary forests of the West Coast is a stunning, old growth wood. Reclaimed from NYC Water Towers, years of exposure to the elements on one side and contact with water on the other result in a rich, red color threaded with occasional black veins.

EBONIZED OAK

Sustainably sourced American Red Oak typically has a straight and open grain and permits easy staining. Hand-finished to produce a lustrous dark, blackened finish that allows the pronounced texture and grain of the wood to shine through.

CUSTOM

Stickbulb offers custom wood finishes and can color match to any FF&E schedule.

ARCHITECTURAL WOOD OPTIONS

NYC SALVAGED PIN OAK

TREELINE is the first consumer product to be made out of salvaged trees from NYC's urban forest.

Over 12,500 trees are removed in NYC every year. In the past, these trees were chipped. We work with the NYC Parks Department and other urban forestry partners to divert this wood from the waste stream and utilize it in TREELINE.

We offer three iconic wood finishes – black, natural, and white – to celebrate the unique and rich texture of this storied material.

BLACK

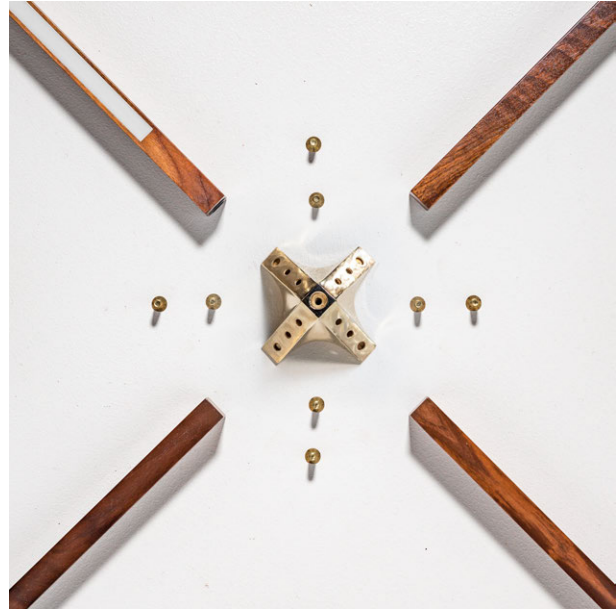

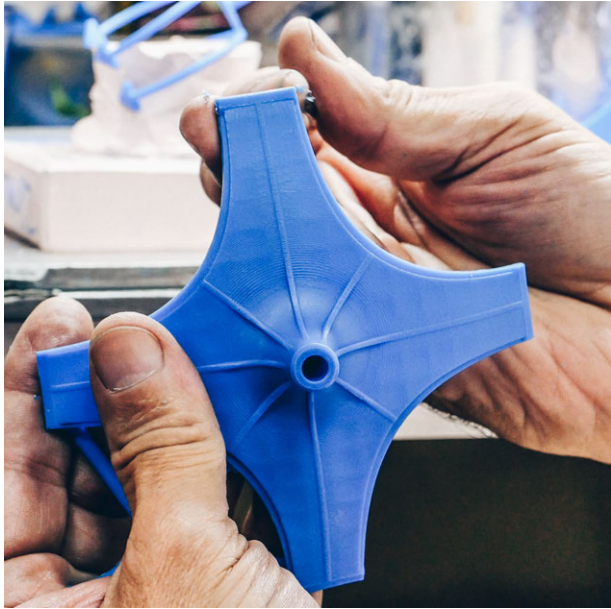

NATURAL

WHITE

Processing salvaged Pin Oak trees for TREELINE on the NYC Waterfront.

MADE BY HAND

All of our decorative and architectural fixtures are made by hand in our NYC studio.

TREELINE in White

TREELINE™

GROWN, SALVAGED AND MADE IN NYC

New York City is home to over 7 million street and park trees which are collectively referred to as NYC's urban forest. TREELINE is made from salvaged Pin-oak from the NYC urban forest. The salvaged wood is processed and milled on the Brooklyn waterfront, 1.16 miles away from our studio. After the wood is processed it is brought to our NYC studio, where our production team carefully makes TREELINE.
